WPAN

Wireless personal alarm button

Overview:

The WPAN is a water resistant wireless personal alarm button which is supported by the SPC system. The device can be worn as a watch or pendant. The device can be programmed to activate a user PANIC alarm or to activate a user defined system output. The WPAN device allows the wearer to instantly raise an alarm if they feel in poor health, under threat, or in physical danger.

Features & Benefits:

- Can be worn as watch or a pendent
- Intuitive LED operation
- Water resistant design suitable for shower wearing
- Button functionality is configurable via the SPC system. E.g. the device could be programmed to activate a kill switch for factory machinery. Can be assigned to a unique SPC user
